

Price of cable trays at the bottom of low-voltage electrical shafts

Overview

Solid bottom cable tray pricing commands \$8-15 per foot, reflecting the premium for maximum protection applications where dust, moisture, and debris prevention are critical. Basic cable tray systems cost \$3-15 per foot depending on type and material. Installation labor adds \$5-8 per foot to total project costs. Ladder trays typically cost 20-30% less than solid bottom systems. Bulk orders of 1000+ feet can reduce unit pricing by 15-25%. Regional variations can impact. ABB designs and manufactures cable tray systems, including perforated tray, cable ladder, channel tray and strut (metal framing), directly from production facilities in Canada and Saudi Arabia. Cable tray pricing represents a crucial consideration in modern electrical infrastructure planning, encompassing various factors that influence the overall cost-effectiveness of cable management systems. This guide breaks down everything buyers need to know, from price trends to cost-saving tips. It is constructed of precision-engineered, high-quality welded steel wire and is the result of decades of research gained from the installation of over 160,000 miles of tray across the globe.
