

# Price of underground fiber optic cable construction

## Overview

---

### How Much Does Fiber Optic Cable Cost per Foot?

On average, commercial projects range from \$5,000 to \$20,000 per mile underground and \$40,000 to \$60,000 per mile for aerial deployment. Individual business connections often cost between \$15,000 and \$30,000 for 100-200. Fiber optic network construction is linking together all forms of digital infrastructure to ensure that optical telecommunications traffic can seamlessly reach end users at the lowest possible cost. These fibers are thin strands, often as small as a human hair, that transmit data as pulses of light. Homeowners and businesses typically pay for fiber optic cable installation based on distance, conduit needs, and labor. According to a report FBA and Cartesian put together, the median cost for underground deployments is \$16.
