

Pricing for fiber optic cable and router connections

Overview

Fiber optic cable installation costs average \$4,500 for most homeowners, with most installations ranging from \$1,500 to \$7,000. Fiber-optic cable pricing depends on whether you're purchasing materials alone or including complete installation. Home and business fiber optics projects typically range from a few hundred to several thousand dollars, depending on run length, fiber type, and labor needs. The main cost drivers are materials, installation time, and environmental factors that affect trenching, conduit, and terminations. Whether you're planning a national fiber rollout or sourcing cables for enterprise infrastructure, understanding how fiber optic cable pricing works can help you budget more effectively and make better.
