

Protecting the Security of Somali Telecommunication Fiber Cables

Overview

The National Communications Authority (NCA) is leading the charge with plans to introduce new regulations for submarine cable landings and a unified fiber optic deployment policy. Somalia is embarking on an ambitious journey to bridge its digital divide by accelerating the deployment of optical fiber infrastructure. This initiative goes beyond merely improving connectivity, aiming for transformative changes across economic, social, and technological landscapes, with the. f Somalia, located on the coast of the Horn of Africa, relies heavily on remittances and traditional livelihoods that are highly vulnerable to climate change.
