

Protective Accessories for Primary Distribution Boxes

Overview

Components such as Miniature Circuit Breakers (MCB), Residual Current Devices (RCD), and Surge Protective Devices (SPD) are integral for circuit protection and fault prevention. Accessories for DIN rail components are required for proper installation in distribution boxes. The product range includes busbars, wiring bridges in various lengths, and protective ground and neutral conductor terminals. Transparent protective covers for panels are specialized components designed to protect the electrical panel components from dust, moisture, and mechanical damage. The groove contours of electronic distribution boxes and the very narrow grooves of micro-distribution housings are seamlessly sealed with the sealing foams of the polyurethane-based FERMAPOR K31 or the silicone-based FERMASIL product families. Additionally, isolators and indicators provide control and monitoring capabilities, ensuring efficient operation and.
