

Qatar Integrated Container Rack Remote Monitoring Type

Overview

The PMS GRASPNet™ Remote Reefer Container Monitoring System provides an automated and reliable solution for monitoring refrigerated container conditions. Wireless Data Communication: refers to data collected and transmitted from the tank container relating to geographic location and sensor information including contribution in the investment costs for tracking equipment. GUDE's remote monitoring systems consist of rack monitoring systems, remote IO modules and LAN sensors. If you are an organization seeking technical guidance on a large project, Vertiv can provide the support you require.
