

Relay Protection for Metering Cabinet

Relay Protection for Metering Cabinet

Grid automation control cabinet GAI4 Control and monitoring for

- Dedicated grid automation protection relay REC615 for protection, control, measurement and monitoring
- Supply voltage 110-250 VAC
- Battery backup with charging and supervision
- Control

Protection relays

Numerical relays are based on the use of microprocessors. The first numerical relays were released in 1985. A big difference between conventional electromechanical

Centralized Substation Protection and Control

The original protection relay, the electromechanical relay, still has a large installed base. It is not uncommon to hear of electromechanical relays that have been in service for 50-60 years.
