

# **Remote Intelligent Monitoring of Small Power Distribution Cabinets**

## Overview

---

We'll explore how to leverage its built-in RS485, Digital Input (DI), and Digital Output (DO) interfaces to achieve comprehensive data acquisition from power meters, real-time status monitoring of circuit breakers, and remote emergency tripping control. Modern precision power distribution cabinets transform the system from a passive distributor into an active manager. Granular Load Management: Rack-Level Intelligence Unlike traditional systems, precision cabinets monitor each branch circuit. The IPDU-20C13-4C19 is a smart power distribution unit (PDU) strip featuring 20 IEC320 C13 and 4 IEC320 C19 sockets, making it compatible with APC PDU and other server rack PDUs operating at 220-250V. Based on the innovative SUM (sustainable, scalable, and maintainable) design concept technology. Its software uses an embedded multi-threaded RTOS kernel solution, supporting multitasking and multi-user access. Tony Li serves as a Technical Support Engineer at Robustel, where he excels at understanding client needs and delivering tailored IoT solutions.

## Remote Intelligent Monitoring of Small Power Distribution Cabinets

---

### Smart PDU Power Strip for Remote Monitoring & Control

Upgrade your power distribution with our smart PDU power strips, featuring remote monitoring and control. Ideal for optimizing data center energy use. Perfect for any professional device.
