

# Reserve space for fiber optic cable reels

## Overview

---

Keep sufficient space between the drums so that forks don't damage the other drum. When stored in upright position, the cable layers do not get entangled during uncoiling. This document provides the guidelines for handling and storage of Optical fiber cable drums. OCC's Modular Advanced Reel System (MARS ®), the industry's first lightweight cable deployment reel system, is designed specifically for the demanding needs of harsh-environment fiber optic installations. The FCR-1000 series cable reels are designed to fit Princetel's standard FORJs and slip rings.

## Reserve space for fiber optic cable reels
