

Router settings for two fiber optic connections

Overview

To set up your router for fiber internet quickly, connect the router to your fiber modem, access the router's settings via a web browser, and input the provided ISP credentials. Are all the strands in the optic fiber cable gonna work at the same time and are they compatible with the transceivers?

Thank you yes, for single-mode modules, you'll need single mode fiber/cable. Check the specs, that the advertised wavelengths and desired distance/length match. If this is the case for Router 1, simply connect it to the cable that carries your internet connection. " Spike Baron is a Network Engineer & Desktop Support Expert based in Los Angeles, California. One solution is to run your own "ISP" and redistribute the connection - that is not uncommon, but not what was asked) I am assuming a very small setup so that is why I have made the suggestion.
