

# **Russian Huijue optical fiber cable breaks**

## Overview

---

The incidents involving both cables occurred in close proximity to each other and near-simultaneously, which prompted accusations from government officials and member states of and as the cause of the damage. Currently, the damage to those undersea cables has not been conclusively attributed to any specific p. On 17–18 November 2024, two submarine telecommunication cables, the BCS East-West Interlink and C-Lion1 fibre-optic cables, were disrupted in the Baltic Sea. Russia's only domestic producer of optical fiber has been offline since May 2025 following Ukrainian attacks, industry officials told the Vedomosti business daily on Thursday. The halted operations have left Russia fully dependent on Chinese supplies for a key component for telecommunications.
