

ST-LC Dual-Core Single-Mode Fiber

Overview

Combining the reliability of the ST connector with the LC connector's highly favored singlemode capabilities, the LightWave ST-LC Singlemode OS2 Fiber Optic Patch Cable is a perfect combination of high performance, low data loss and cost efficiency. What are Fiber Optic Connectors?

A fiber optic connector is a mechanical device that allows two fibers to be joined precisely, enabling light to pass with minimal insertion loss and reflection. Each LC/ST Duplex OS2 fiber patch cord has passed the test of Insertion Loss, Return Loss, and End-face Inspection in the factory, ensuring it complies with and exceeds industry standards. Fiber Optic Patch Cable also is known as a fiber patch cord, optical cable, or fiber optic jumper. Thorlabs offers single mode fiber optic patch cables with a variety of connector options, including FC/PC, FC/APC, and hybrid FC/PC to FC/APC and FC/PC to SMA. Cabling OS1 / OS2 cables are not just any cables; they are G652D OS2, fully compliant with the ITU-T recommendation G.
