

**FRINDEL OPTICS**

# **Saudi Arabian power distribution box CQC certification**

## Overview

---

Basic Requirements: Suppliers must obtain a certificate of conformity issued by a SASO-approved certification body in accordance with the conformity assessment form (Type 1A) specified in ISO/IEC 17067, provide a test report from an accredited laboratory proving product. We craft them with precision, test them rigorously, and back them with certifications that make even the most demanding clients breathe easy. Because in a world where a single electrical fault can delay a project by weeks (or worse, compromise safety), cutting corners isn't an option. It features a robust design that meets high standards of durability and corrosion resistance, complying with SE Specifications 42-SDMS-01A. Our products comply with global certifications and international standards, fulfilling Saudi Arabia's infrastructure requirements and supporting Belt and Road projects throughout the region.

## Saudi Arabian power distribution box CQC certification

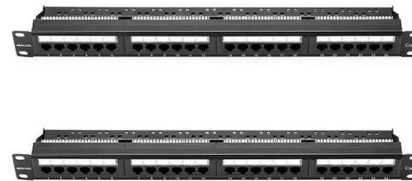

### Affordable Home Electrical Distribution Box , Saudi Supplier
