

Sealing the openings of cable trays in walls

Overview

For large openings, install a fire-resistant backing plate before sealing. Layout and positioning must be reasonable to facilitate installation and maintenance. Where cables pass through shafts, walls, slabs, or enter electrical panels or cabinets, openings shall be tightly sealed with firestopping materials in accordance with. Cable trays provide essential routes for power and data cabling in modern infrastructure. FIRSTO firestops are designed to seal multi-cable and cable tray penetrations of fire-rated walls and floors. The following charts give the number of 3M pillows needed to completely firestop an opening that cable tray passes through. UL Listed Systems Concrete Wall - C-AJ-4056 3 HR F-Rating, 3/4 HR T-Rating Gypsum.
