

Sheet metal patent for distribution boxes

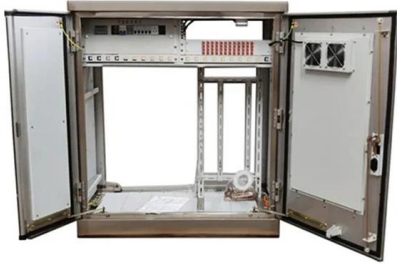

Overview

The present invention provides a distribution box for battery mounting manufactured through a sheet metal processing device, which comprises a frame provided in the shape of a rectangular solid, first panels respectively coupled to upper and lower parts of the frame, second. Some of these components are high-voltage components and some are low-voltage components. The circuit breaker includes a housing, a control apparatus, and a current signal collection mechanism, an operating mechanism, and contactor mechanism that are disposed in the housing.

Sheet metal patent for distribution boxes

What Are the Main Materials Used in Distribution Boxes

Distribution box material options include steel, aluminum, PVC, polycarbonate, and SMC, each offering unique benefits for safety and durability.
