Configuring the Open Shortest Path First (OSPF) routing protocol

OSPF is an open standard (RFC 2328, RFC 5340), and consequently many routers from a wide number of vendors support the protocol. OSPF is a routing protocol designed for large, routed networks. This

Chapter 8: OSPF

If a router does not receive a hello before the OSPF dead interval timer reaches 0, the neighbor state is changed to down. The OSPF router sends out an LSA, with the topology change, and the SPF
