

Small-scale modular integrated data cabinet

Overview

The cabinet modular data center provides an integrated solution for power distribution, cooling management, fire safety, and structured cabling. They contain all of the compute, storage, networking, as well as the infrastructure to contain and support the workload. To meet this need, SOETECK has developed the Cabinet Modular Data Center, which addresses common challenges in traditional data centers, including long setup times and high operational costs. Delta InfraSuite is a new generation, highly integrated modular datacenter solution.
