

Smart City Aggregation Switch LPO

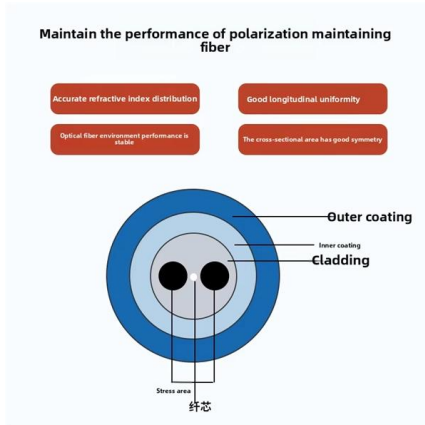

Overview

The Smart Aggregation Switch is designed specifically for deploying Operational Technology networks in intelligent buildings. Access devices downstream to the core layer can automatically go online through Zero Touch Provisioning (ZTP). One of the most groundbreaking network innovations driving transformations of data centers in 2025 is Linear Pluggable Optics (LPO)—a Digital Signal Processor (DSP)-free optical solution designed to optimize power, cost, and latency. 8 Tbps high-density 100G/25G Layer 3 Etherlighting™ aggregation switch with MC-LAG support for high availability system design. Requires a 4-post rack, or a center-mount bracket or cantilever shelf on 2-post racks for optimal support. Changes in the traffic patterns in large carrier networks have challenged design rules and accompanying economics and planning rules.
