

Sns2124 Fiber Optic Switch

Overview

The SNS2124 significantly increases performance and functionality for SANs at an entry-level price. Based on sixth-generation FC technology, combines auto-sensing 1, 2, 4, and 8 Gbps throughput with features that greatly enhance fabric operation. These Fibre Channel switches are designed for small SANs and edge networks, offering superb cost-effectiveness, high bandwidth, and on-demand scalability up to 1536 Gbit/s. The SNS2124/SNS2224/SNS2248 FC switch is a small-to-midsize business-class FC switch that is designed to handle smaller-scale SAN requirements. High bandwidth: Unblocked architecture is used, allowing SNS switches to run at a rate in full configuration (full duplex). As a critical component of modern distributed file systems, this storage system supports secure, scalable.
