

# **Special fiber optic cable for broadcasting**

## Overview

---

This optical fiber cable is designed for radio and television broadcasting applications. It features a robust construction with a protective outer jacket, aramid yarn for tensile strength, and tightly buffered optical fibers. Fiber optic infrastructures offer the advantage of higher bandwidth, optical signal clarity and more reliable real-time transmissions, enabling providers to service even more applications for emerging technologies such as 4K and 8K ultra high-definition television (UHDTV), Internet-protocol. With OPTRAL cables for Broadcast spooled cables can be moved easily and they are made of high friction and crushing resistant materials. Designed for defense, aerospace, oil & gas, railway, marine, and industrial automation sectors, these cables. Fibre4TV is the UK's leading supplier of broadcast fibre optic equipment and field deployable fibre optic cables for sale and hire to the broadcast and events industries.
