

# **Standards for the Laying of Fiber Optic Cables for Surveillance Monitoring on Perimeter**

## Overview

---

163 describes criteria for the installation of optical fibre cables defined in Recommendation ITU-T L. (FOA) was founded in 1995 to help develop the workforce to build the fiber optic networks to support a rapid expansion in communications and the Internet. Recommendations for Fiber Optic Cable Installation Where reels are supplied with protective material fitted over the cable, the protection should remain in place until the cable will be installed. Installing and Testing Fiber Optics Published by National Electrical Contractors Association Jointly developed with The Fiber Optic Association The Fiber Optic Association FOA TM National Electrical Installation Standards™ The Fiber Optic Association FOA Standard for Installing and.

## Standards for the Laying of Fiber Optic Cables for Surveillance Mon

### Direct-Buried Installation of Fiber Optic Cable

Cable Precautions / Specifications CAUTION: Take care to avoid cable damage during handling and installation. Fiber optic cable is sensitive to excessive pulling, bending, and crushing forces. Any

### **FOA Standard For Installing Fiber Optic Cable Plants**

The type of fiber optic cable and the fibers in the cable should be chosen appropriate for the type of communications system(s) being supported, the type of installation and the environment in which the

[Contact Us](#)

### **Standard for Installing and Testing Fiber Optic Cables**

The following language is recommended: Fiber optic cables shall be installed in accordance with NECA/FOA 301, Standard for Installing and Testing Fiber Optics. Use of NEIS® is voluntary, and
