

# Swiss Fibre Channel Optical Module

## Overview

---

For municipal utilities building their own fibre networks as Swisscom alternatives, modular splice systems with 96 fibres per 1U prove highly. FiberOptic is a Swiss fibre technology manufacturer, based in Spreitenbach near Zürich. We specialise in the manufacturing of custom and standard solutions for light guides with a variety of fibres. Each customer's individual requirements determine how we develop technically flawless solutions for. FS provides Fibre Channel Modules, free & fast delivery, expert tech support, outstanding warranties. The term "Fibre To The Home" (FTTH) describes the telecommunications network which brings optical fibre to households and businesses. The company, Diamond SA, specializes in manufacturing high-performance fiber optic interconnects, including the only single-channel fiber optic interconnect qualified by the European Space Agency.
