Aggregation Switch

An Aggregation or "Top-of-Rack" switch is designed to connect everything in a rack at high speeds, then have an even bigger pipe out to the rest of the network.

Optical splitter cassette type refers to the port 2.0mm / 3.0mm clip-on fiber multichannel direct output with a plastic box packaging protection and easy to use.

Optical splitter rack mount type is using metal box packaging which can be installed in 1U* frame or cabinet.

Optical splitter LSS box type is made by flame retardant material box or plate packaging. Mainly suitable for cable printed fiber box and wall-mounted terminal box.

Optical splitter mini type refers to the port 0.9mm clip-on fiber multichannel direct output with a compact design and easy to use.

windows

You could have two separate networks attached to your machine. So if you had two switches on two different networks, you could hook up one port to each switch. The primary use for a situation like
