

Tbox terminal box

Overview

Neusoft's T-Box is an intelligent in-vehicle interconnection terminal used to monitor new energy vehicles. The S32K148-T-BOX is a reference design board engineered for out-of-the-box validated automotive telematics box (T-Box) applications. Based on the 32-bit Arm® Cortex®-M4F based S32K148 microcontroller, the S32K148-T-Box solution offers a flexible evaluation platform for the T-Box. It serves as a critical link in the Industrial Internet of Things (IoT) ecosystem, enabling seamless communication between field assets and supervisory. We offer bespoke, custom-made terminal boxes and terminal box combinations, as well as standard products with short delivery times.
