

The blue electrical distribution box cannot be pushed up

Overview

Check the electrical load and ensure that the sensors do not exceed the 10 Amp maximum. Distribution boxes are the unsung heroes of our electrical systems, quietly managing power until something goes wrong. The left side of the box is probably mounted to the stud so grab a longer drywall or deck screw, I think 3" long and go in through one of the holes in the back of the box at an angle left and drive the screw into the stud.
