

The cable reel is a distribution box

Overview

A cable reel is a round, drum-shaped object such as a used to carry various types of. With cable lengths of up to 50 metres, they can reliably and safely power any point of use and any application with electricity. It typically consists of a solid core (or drum) and flanges on either end, with holes or notches to secure the cable and prevent tangling. The basic components of a reel of cable include: Flange - Typically circular, the flanges. The distribution assemblies can be broadly classified in categories as below These assemblies are available enclosure material such as — ABS, Polycarbonate, CRCA, Stainless Steel, GRP, FRP & Aluminium & with both IP 44 and IP 67 protection.
