

# The fiber optic switch keeps restarting

## Overview

---

Restart Devices : Reboot switches, routers, or media converters to resolve temporary glitches. Check Indicator Lights : A "LOS" (Loss of Signal) LED on transceivers signals connectivity issues. Configuration errors are a hidden culprit: On a big industrial plant we've replaced an old HP switch with a brand new couple of C2960x switches in stack configuration and ever since then, every 6/8 hours or so, the two fiber optics links of switch #2 go down at once. Resetting your ONT box can often resolve connectivity problems, but it's essential to do it correctly to avoid any unintended consequences. In this article, we'll take you through the step-by-step process of resetting your ONT box, as well as provide you with some valuable troubleshooting tips to. This document describes how to troubleshoot fiber optic interfaces by addressing some of the fiber optic module and cabling specifications.
