

The router is inside the fiber optic box

Overview

The fiber is connected to an Optical Network Terminal (ONT) inside or outside your home. However, setting up a fiber optic connection to your router can seem daunting if you're unfamiliar with the process. That's an ont buddy the ports are typically designed on/off at the provider level no one is getting into your main network through that, there should be a second box inside that is the actual gateway for your internet right?

This is correct. Post-installation optimization matters —proper router placement, firmware updates, and network security configuration maximize your fiber internet investment.

The router is inside the fiber optic box

How does fiber come into the house?
