

Total length of Nauru optical fiber cable

Overview

EMCS is an optical submarine cable with a total length of about 2,250 kilometers, connecting four islands in three countries, the Federated States of Micronesia, Kiribati, and Nauru, and is the first optical submarine cable to connect Kiribati, Nauru, and the Federated States. Welcome to Nauru Fibre Cable Corporation (NFCC), your gateway to reliable, high-speed internet and telecommunication services. As Nauru's leading telecommunications infrastructure provider, we are committed to enhancing connectivity across the island by delivering efficient and low-cost internet. It will be called the East Micronesia Cable System (EMCS) and have a total length of approximately 2,250 kilometres.
