

Tunisia Passive Optical Network QSFP28

Overview

The QSFP28 (Four-channel Hot Swap) passive high-speed cable module provides four data transmission channels with a maximum transmission rate of 28 Gbit/s and meets the requirements of 100 Gbit/s Ethernet (4x25 Gbit/s) and InfiniBand Enhanced Data rate (EDR). QSFP28 (Quad Small Form-Factor Pluggable 28) enables 100G transmission by aggregating four parallel 25G electrical lanes, delivering an optimal balance of bandwidth efficiency, power consumption, and deployment flexibility. This guide provides the definitive roadmap for selecting, deploying, and troubleshooting QSFP28 transceivers while bypassing the painful trial-and-error phase. Cisco® QSFP28 100G ZR extends 100GbE coherent links from QSFP28 ports reaching up to 80km over dark fiber and up to 300km over amplified Dense Wave Division Multiplexing (DWDM) links. By providing four lanes of 25G, QSFP28 enables a streamlined upgrade path from lower-speed networks, making it a popular choice for scaling data center interconnect (DCI) and. It is the essential component that enables flexible, scalable connectivity across switches, routers, and servers.
