

Overview

Shop premium Active Optical Cables (AOC) for 10G, 25G, 40G, 100G & 400G networks. Lightweight, long-reach, low-latency fiber connectivity for switches, servers & data centers. An Active Optical Cable (AOC) is an integrated optical transceiver assembly that uses fiber optics to transmit high-speed data over longer distances than passive copper cables. The term "active" signifies that electrical components are used to boost and convert the signal along the way. DOUBLE DENSITY, COST EFFICIENT, HIGH PERFORMANCE Amphenol QSFP DD to QSFP DD 200G Active Optical Cable assemblies increase the number of lanes from 4 to 8 and double the port density as compared to 100G QSFP28 AOC. These AOC assemblies are QSFP DD MSA compliant, also backwards port compatible with.

UAE AOC Active Optical Cable Low Noise

6 Things You Should Know About Active Optical Cable

AOC Cables vs. Optical Transceivers, What is the difference? Stability: Unlike an optical transceiver, the AOC active optical cable visual
