

Uganda Smart PDU System Solution

Overview

Intelligent Power Distribution Units – Switched, Metered & Monitored PDUs for Data Centers, Telecom, and Industrial applications. Our comprehensive range of Smart nVent iPDUs, is designed to transform the way you manage power in your data center. Products include advanced solutions for real-world power, environmental, and security management problems in. Smart Grid involves integration of Information Communication Technologies (ICT) into the conventional power grid enabling bi-directional transfer of energy and information between the consumers and utility, plus introduction of Distributed Energy Resources (DER) in order to improve monitoring and. With smart grid tech, remote monitoring, and energy optimization, it enhances efficiency, reduces costs, and improves safety.

Uganda Smart PDU System Solution

What Is a Smart PDU? , Data Center Glossary , Sunbird

Smart PDU Monitoring with DCIM Software Data Center Infrastructure Management (DCIM) software is often used to enhance many of the features and capabilities
