

Vietnam manufacturer ONT optical network terminal PAM4

Overview

VVDN has indigenously designed, developed, and manufactured Wi-Fi 6 based GPON ONT. This state-of-the-art Optical Network Terminal (ONT) is based on a powerful EN7529 ARM processor and is integrated with External FEMs for extended coverage, revolutionizing the way users connect to 4GHz and 5GHz dual band Wi-Fi, providing high-speed connectivity for connected devices. PAM4 is a branch of the pulse amplitude modulation (PAM) technology, which is a mainstream signal transmission technology following non-return-to-zero (NRZ). Through our extensive experience, Advanced Engineering team, and robust research and development department, we work directly with you to unlock the full potential of your network. In today's fast-paced digital world, the demand for high-speed internet is at an all-time high.

Vietnam manufacturer ONT optical network terminal PAM4

ONT What is it and how is it used in a fiber network?

What Is an ONT? ONT stands for Optical Network Terminal. It's the device that: Connects directly to a fiber optic line run by your Internet provider
Converts that
