

What equipment is paired with a distribution box

Overview

In offices, shopping centers, schools, and public buildings, distribution boxes support lighting systems, HVAC equipment, and general building power distribution. Distribution boxes, often called breaker boxes or fuse boxes, are basically the central hub where electricity from your main supply gets divided into different circuits. Think of them as traffic controllers for power—they direct energy where it needs to go while protecting against overloads or. But what exactly is a power distribution box, and why is it so essential in our daily lives?

The DB panel board controls the flow of electricity.
