

# What is a GCS distribution box

## Overview

---

This low-voltage complete distribution unit is used in three-phase AC systems with frequencies of 50 (60)Hz, rated voltages of 380V (400V) or 660V, and rated currents up to 4000A, for power distribution, centralized motor control, and reactive power compensation. GCS distribution cabinet is mainly 1/4 of small units, 1-16 units per cabinet, withdrawable structure; GCK distribution cabinet is a large unit mainly 1/2, 1-8. Low Voltage Power Withdrawable Switchgear Cabinet GCS Enecell is GCS Low Pressure Withdrawable Switchgear Manufacturer, Company, GCS low-voltage withdrawable switchgear is suitable for power distribution systems in power plants, petroleum, chemical, metallurgy, textile, high-rise buildings and. GCS low-voltage withdrawable switchgear, also called low-voltage drawer cabinet, is designed and developed by the two joint design teams according to the requirements of industry authorities, the majority of power users and design units, which meets national conditions, has high technical.

## What is a GCS distribution box

---

### GCS type low voltage withdrawable switch cabinet

The GCS type low-voltage withdrawable switchgear (hereinafter referred to as the device) is a new type of low-voltage withdrawable switchgear designed based on the principles of safety, economy,
