

What is a fixed bridge reinforcement cable tray

Overview

These robust cable trays are made to hold and arrange cables, protecting them from the elements and making maintenance and upgrades simple. -piece tray is typically used in applications where visual esthetics are important. They serve as an alternative to traditional conduit systems, offering increased flexibility and ease of installation. With the RS 60 cable tray installation system, we offer you the last installation type of the standard support construction, so that you can implement all installations required in the building project with circuit integrity maintenance on the basis of the standard support construction.

What is a fixed bridge reinforcement cable tray

Reinforced concrete cable trays: dimensions, application

In a variety of construction projects, electrical cables are supported and shielded by a strong, long-lasting structure called a reinforced concrete cable tray.
