

What is an AWD distribution box

Overview

Amazon Warehousing and Distribution (AWD) is a low-cost bulk storage solution that distributes your inventory to the Amazon store and non-Amazon sales channels. AWD pricing covers FBA inbound placement, so there is no separate charge for this service. The following requirements apply to all boxes shipped to AWD distribution centers. By addressing storage, distribution, and inventory management challenges, AWD ensures a seamless integration of upstream warehousing with downstream fulfillment operations.
