

What is an LDB distribution box

Overview

A low voltage distribution board is an electrical panel used for energy distribution at voltages below 1,000 volts. The primary function of these boards is to distribute electricity evenly and safely from a power source to various sub-circuits while ensuring circuit protection. Why need a Accu-Panel Lighting Distribution Panel is built like a showpiece, from its stainless steel or MS CRCA enclosure to its heavy duty distribution box. Over the years it has been tested by hard rental and industrial usage, and it has passed with.

What is an LDB distribution box

Lighting Distribution Board

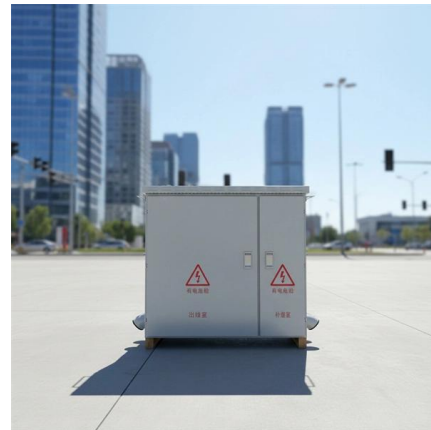

A Lighting Distribution Board (LDB) is an electrical panel that serves as a centralized point for distributing electrical power to various lighting circuits within a building or
