

What is the K distribution box

Overview

Box 19 on Schedule K-1 (Form 1065) reports distributions you received from the partnership during the tax year. In probability and statistics, the generalized K-distribution is a three-parameter family of continuous probability distributions. This avoids detailed calculation of modified Bessel functions of the second kind. They are a fundamental aspect of investing in income-generating assets, serving as a key indicator of a company's financial health and its management's confidence in future cash flow. Here's how to read it, reconcile it with your broker, and apply it to your basis calculation.

What is the K distribution box

K-1 Box 19 Distributions -- What They Mean for Your Basis

K-1 Box 19A shows your MLP cash distributions. They reduce your basis dollar-for-dollar. See the impact with our free calculator.
