

What list should be included when removing cable trays

Overview

The plan should include the timeline, who does what, and what to do in an emergency. Table: Key Steps for Cable Tray Demolition Preparation It involves several important steps. Confirm the Area and Scope First, you must look at the project drawings and check them against the actual site. Having the right tools and equipment is essential for efficient and safe cable removal. As with any electrical equipment, cable trays and the wiring contained in the trays must be listed, labeled or otherwise approved, pursuant to the requirements of 29 CFR § 1910. As cable trays, ladders & channel supports are generally designed with no freely moving parts, there is very little maintenance activity required.
