

What router should I use for a 50m fiber optic leased line

Overview

The best router for fiber internet is one that matches your plan speed, home size, and how you use your connection. Our top overall pick is the Netgear Nighthawk RS700S, a Wi-Fi 7 router built for multi-gig fiber plans that handles up to 200 devices across 3,500 square feet. Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. Google Nest WiFi: This router offers fast speeds and excellent coverage, making it ideal for fiber connections. However, the market is flooded with countless options, making the selection quite overwhelming.
