

What s the story behind the South African fiber optic cable explosion

Overview

On August 6, 2023, two undersea cables were severed simultaneously, resulting in internet disturbances in South Africa. Fibre providers are under siege, and South Africa's hopes for widespread, affordable internet are being trampled by guns, greed, and gangster-style tactics. Workers haul part of a fibre optic cable onto the shore at the Kenyan port town of Mombasa. — The New York Times One morning last March, tens of millions of people in West Africa woke up to find they had no more Internet.
