

What type of cable tray is a cable tray with partitions

Overview

Cable trays are components of support systems for power and communications cables and wires. Channel type An engineer or designer will usually specify the type of cable tray that has the features to suit the project.

Steel:Electric shielding; low thermal expansion Stainless steel:Superior corrosion resistance; withstands high temperatures. Non-MetallicFiberglass:Nonconductive; resists corrosion; lightweight Precautions: The most important issue is to ensure that the bend radius for the fiber-optic or coaxial cable is maintained within the standards.

What type of cable tray is a cable tray with partitions

Cable tray

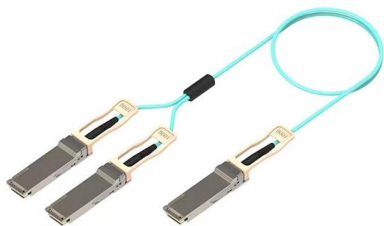

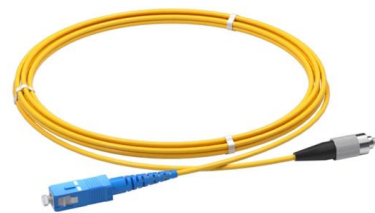

A solid-bottom tray provides the maximum protection to cables, but requires cutting the tray or using fittings to enter or exit cables. A deep, solid enclosure for cables
