

# Where do the price differences for cable trays lie

## Overview

---

- Steel cable trays cost \$2-8 per foot compared to aluminum at \$4-12 per foot and fiberglass at \$6-15 per foot
- Heavy-duty industrial cable management system pricing includes 30-50% premium over standard configurations
- Installation costs typically add 40-70% to base material. Let's look at cable trays the way buyers eventually do: through total spend, not unit price. What "Cost-Effective" Actually Means on a Project?

A cost-effective cable tray isn't the cheapest option. Cable trays will tend to be significantly less expensive to use in 2026 than metal pipes due to their faster installation. Steel has been the default material for cable tray specification on industrial and infrastructure projects for decades.
