

Which is faster for internet speed fiber optic or router

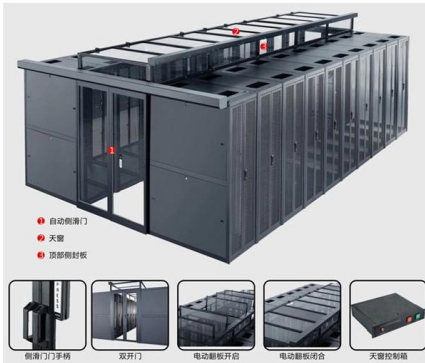

Overview

A fiber router is designed to work specifically with fiber optic internet connections, providing faster and more reliable speeds compared to a normal router that typically works with traditional broadband connections. Fiber optic internet is the most modern standard for high-speed connections, offering top speeds for browsing, streaming, and gaming. Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber.

Which is faster for internet speed fiber optic or router

Best routers for fiber internet 2025: our top picks for fast broadband

Fiber speeds are much faster than cable internet with fiber being the fastest internet connection. Fiber cables have a higher bandwidth than coaxial cables, which means they can carry more data.
