

# **Will leaving the beam splitter enclosure door open consume electricity**

## Overview

---

For homeowners seeking to manage utility expenses, the answer to whether an open door wastes electricity is a definitive yes. Leaving an exterior door ajar, even for a short time, directly impacts the efficiency of a home's heating, ventilation, and air conditioning (HVAC) system. Otherwise I can only try to give tips: I recommend not using splitters but branches because splitters themselves consume energy. When the door is ajar, conditioned air escapes, forcing HVAC systems to work harder to maintain the desired indoor temperature.
