

Yellow trip light on the distribution box

Overview

This means you have a short to earth, in an appliance, lighting fixture or due to water leaking somewhere. What are the green, yellow, and red LED indicators on the Micrologic trip units of PowerPacT H, J, and L frame circuit breakers?

Purpose of the green (ready), orange (>95) and red (>105) indicators on H, J and L breaker trip units Circuit Breaker When the green LED is flashing, the electronic trip. Do you have a question about the Rapid TripFix and is the answer not in the manual?

If the GE Rapid TripFix double pole 50 amp GFI is blinking red and yellow, it indicates a failed internal test and that the breaker needs replacement. If the trip unit has auxiliary power connected, the trip unit will display information about the trip. You should remove all receptacles from the upstairs rooms and leave the boxes open. Notice that your device is RCD residual current device (30mA) plus a 16A circuit breaker.
